Resonance of the Past, Spirit of the Future

Exploring transcendent unity in a world of multiplicity

In an era where digital technologies are reshaping the very essence of architecture, the fusion of tangible and intangible cultural heritage with spirituality offers a rich tapestry of exploration. The proposed symposium seeks to delve into the captivating nexus between architecture, culture, and spirituality, with an emphasis on the transformative role of digital technologies in both education and practice. Set against the majestic backdrop of Istanbul, a city straddling the crossroads of civilizations, this symposium aims to unravel the profound interplay of tradition and innovation.
